

# TREND 2005™ Software

New Windows\* Based Motor Circuit Analysis Software for Predictive Maintenance, Troubleshooting and Condition Monitoring Of AC Motors

TREND 2005 software provides Off-Line Motor System Maintenance and Management for your organization. The software integrates seamlessly with the ALL-TEST IV PRO 2000™ Motor Circuit Analyzer and data collector to create a complete tool for motor Incoming Inspection, Trouble-Shooting, and PdM.

### Trending and Data Analysis

Built-in diagnostic algorithms take the guesswork out of interpreting test results for AC motors. All measurements can be trended for predictive maintenance.

### Extensive and Flexible Reporting

Standard reports include:

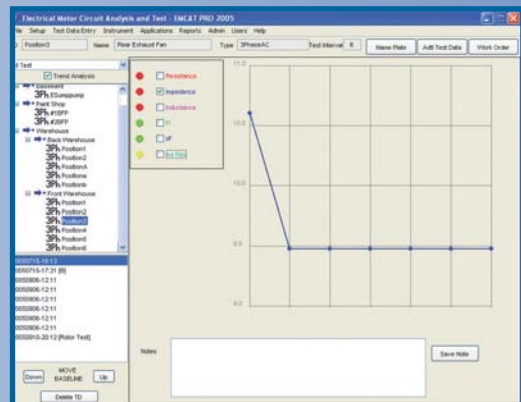

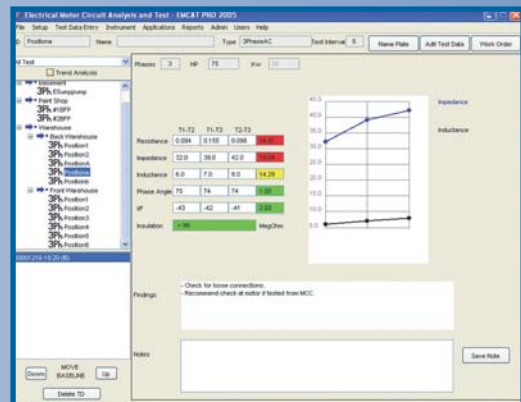

- Detailed test reports and trend reports for individual motors
- List of equipment to be reviewed as indicated by previous tests
- Past-due motors for testing

### Collect all your Data in One Program

TREND 2005 provides fields to record test data from other PdM technologies including Vibration, IR, Current Signature, P.I., Ultrasound, and High Potential test results. Evaluate all aspects of machine health from within a single program!

### Interface with Your CMMS

TREND 2005 data can be easily exported to other software with a few clicks on your mouse. Moreover, users of Trend 2003 can migrate existing test data to TREND 2005.

### System Requirements

- Pentium computer or equivalent running Windows XP™ or later versions.
- 256 MB RAM, minimum 10 MB available hard disk space.
- 15" screen for laptop; 17" screen for PC.
- 1024 X 768 minimum screen resolution.
- RS-232 port or adaptor for uploading and downloading.
- JavaRuntime Environment\* 1.4 or higher. Can be downloaded from the CD.
